

INSTALLATION MANUAL

WEED GUARD

This installation guide is for installing a weed guard onto a Gen 2 or Gen 3 XL system with any available mount style.

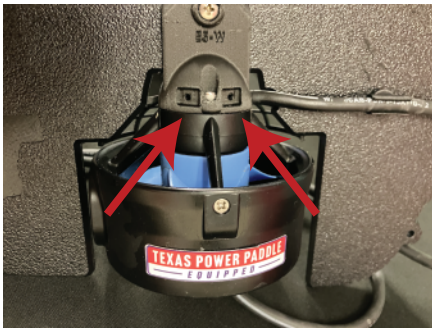

1. Gather supplies.

Weed guards come in 2 identical sides with 4 screws. You will need a Phillips screwdriver.

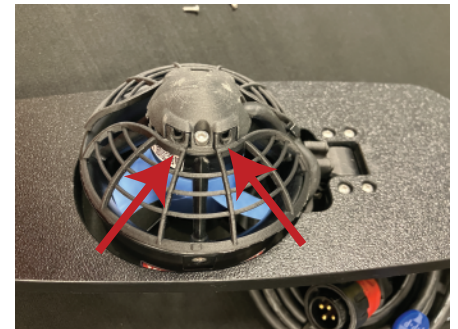

2. Align weed guard.

Align one weed guard side with the two screw holes on the motor mount.

For Rudder-Integrated or Universal Models

For Transducer Mounted Models

3. Screw into place.

Screw both screws firmly into place. Repeat on the other side.
